Server Control Panel

Now you can boost your revenues by implementing the world's most advanced control panel by SCInterface®. Developed exclusively for data center and enterprise deployments, you get more control over your hosted application with a user-friendly interface and a highly customizable setup.

Quick Facts

- Deploy web, email and database servers in minutes, not hours.
- Centralized interface can run both Linux and Windows servers at the same time.
- Fully customizable interface and commands give you complete control over your servers.
- Ideal for VPS environments including VMWare, Xen, Virtuozzo and Virtual Iron.
- Supports advanced clustering and load balancing environments.
- Quickly and easily move servers between other systems.
- Automatically restart, install, provision accounts and more.

Free Trial
